

News Release

January 23, 2007

Greenville, South Carolina — Matthew Jackson has joined Warren and Associates Design-Build, LLC, as Project Engineer. Greenville-based Warren and Associates Design-Build focuses exclusively on design-build project delivery for commercial, industrial and church-related facilities primarily in the Carolinas.

Jackson has more than 10 years of construction experience, primarily in project management for a family owned general contracting business based in South Carolina. During his career, he has gained invaluable experience through exposure to all aspects of the business. He has self-performed, supervised, and managed scopes of work from sitework, to finishes, to project closeout.

Among Jackson's current assignments is a 5,200-square-foot commercial office building for Roper Partnership, LLC. Located in Greenville, the project is scheduled to break ground in January 2007 with an anticipated completion in summer 2007. As Project Engineer for Warren and Associates Design-Build, Jackson is responsible for planning, organizing and managing day-to-day jobsite activities.

Jackson is a 2004 graduate of Lander University where he earned a B.S. degree in Business Administration with emphasis in Marketing and Management.

Jackson lives in Greenville, South Carolina.

About Warren and Associates Design-Build, LLC

Greenville (SC)-based Warren and Associates Design-Build, LLC, was established in 2006 by Donald G. Warren, a 30-year veteran of the construction industry. Prior to starting Warren and Associates Design-Build, Warren served as President and Chief Executive Officer of Suitt Construction Company, Inc. Warren is one of only two practicing Designated Design-Build Professionals™ in North and South Carolina. A founding member of the Design-Build Institute of America (DBIA), he has been actively involved with that national organization since its inception in 1993. The Design-Build method of project delivery embraces architecture/engineering and construction services under a single contract, thereby re-integrating the roles of designer and constructor.
